DETAILED ACTION

Election/Restrictions

1. Claims 1-41 are generic to a plurality of disclosed patentably distinct species

comprising ferroelectric memory devices and their corresponding reading methods. Applicant is

required under 35 U.S.C. 121 to elect a single disclosed species and its associated method of

operation, if any, even though this requirement is traversed.

2. Should applicant traverse on the ground that the species are not patentably distinct,

applicant should submit evidence or identify such evidence now of record showing the species to

be obvious variants or clearly admit on the record that this is the case. In either instance, if the

examiner finds one of the inventions unpatentable over the prior art, the evidence or admission

may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Conclusion

3. A shortened statutory period for response to this action is set to expire 1 (one) month and

0 (zero) day from the date of this letter. Failure to respond within the period for response will

examiner should be directed to Ly D Pham whose telephone number is 571-272-1793. The
